## GROUP MEMBER RESPONSIBILITIES

Baran Açıkgöz: login, signup modal code implementation

Elif Işık : Heuristic Evaluation

Muhammed Fatih Özdil : Graphical Implementation, heuristic evaluation

Mustafa Arınmış : Graphical Implementation, Presentation of the Working GUI

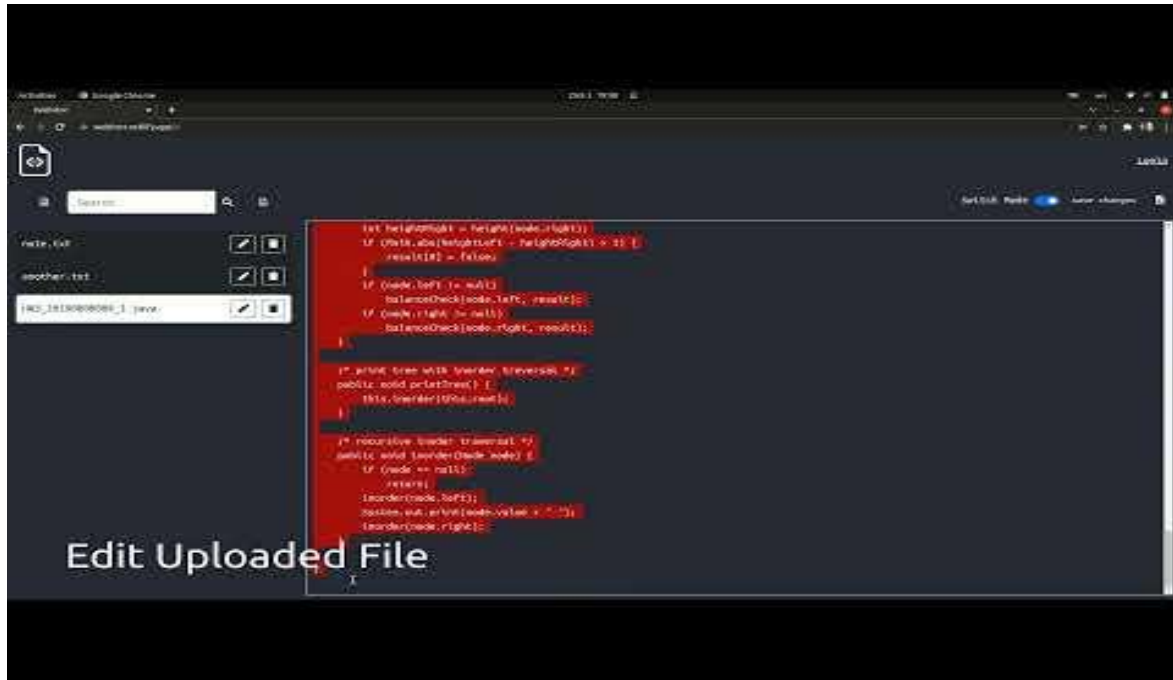

## GRAPHICAL IMPLEMENTATION

Deployed app : <https://webitorr.netlify.app/>

Source code : <https://github.com/Arinmis/webitorr>

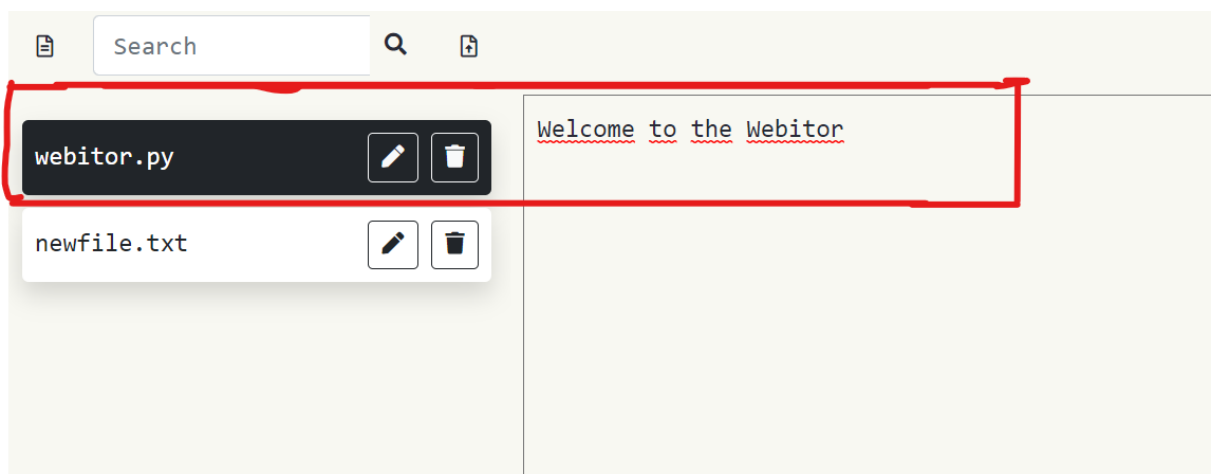

# PRESENTATION OF THE WORKING GUI

[webitor presentation](#)

## HEURISTIC EVALUATION

### 1-Visibility Of System Status

- Users are able to see which file contains which data.

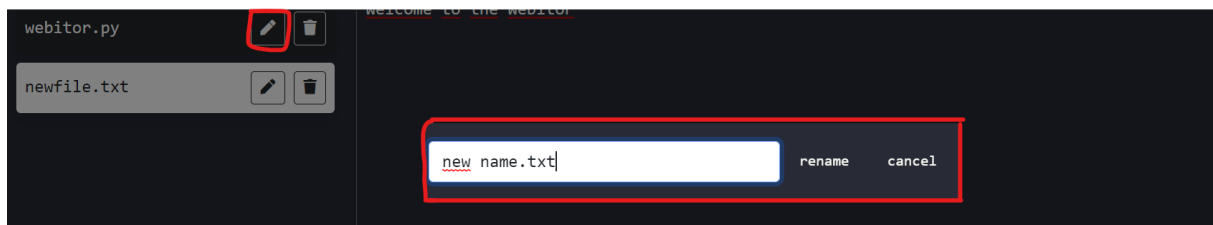

## 2-Match Between System And The Real World

- Website jargon adapts to the real world

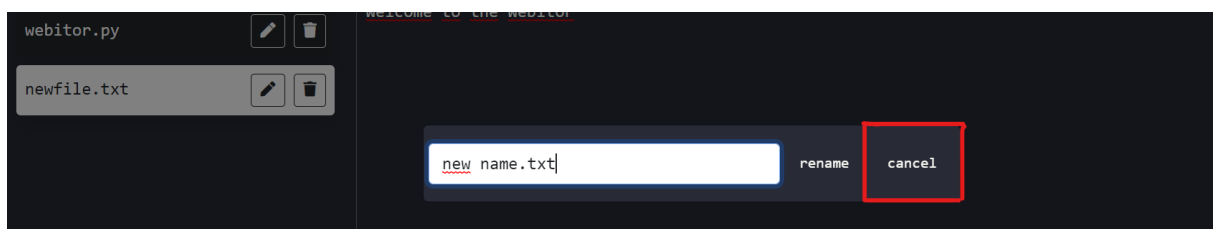

## 3-User Control And Freedom

- It supports dark mode therefore users are free to choose between dark mode and light mode.

- User can rename the created file.
- There is no support for undo and redo.

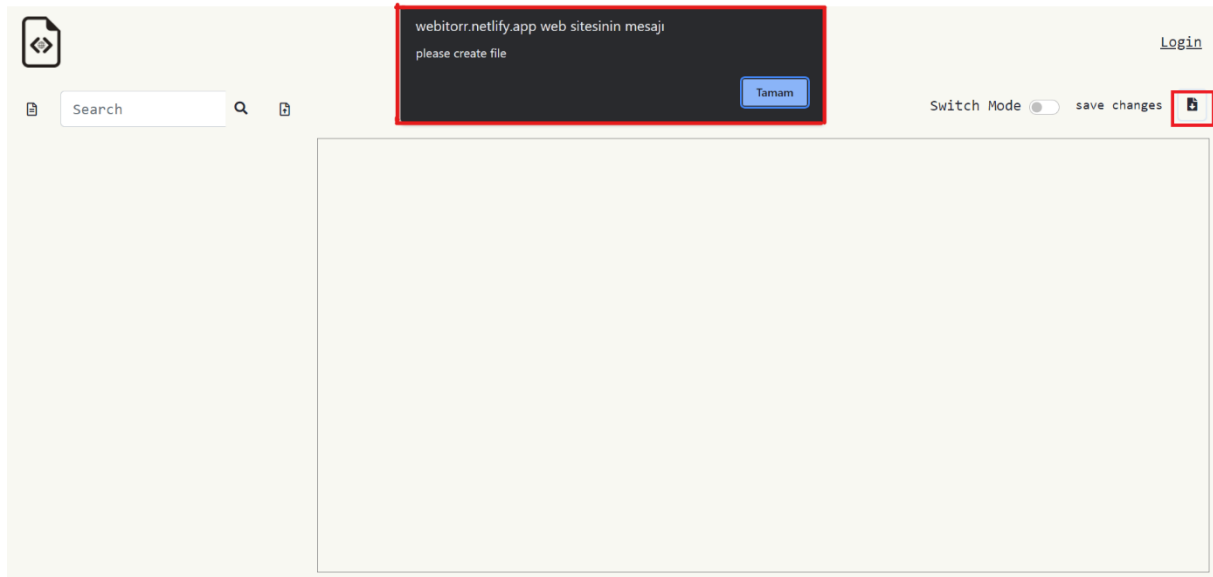

- Users are free to cancel user dialogs by clicking cancel button.Exit is clearly labeled.

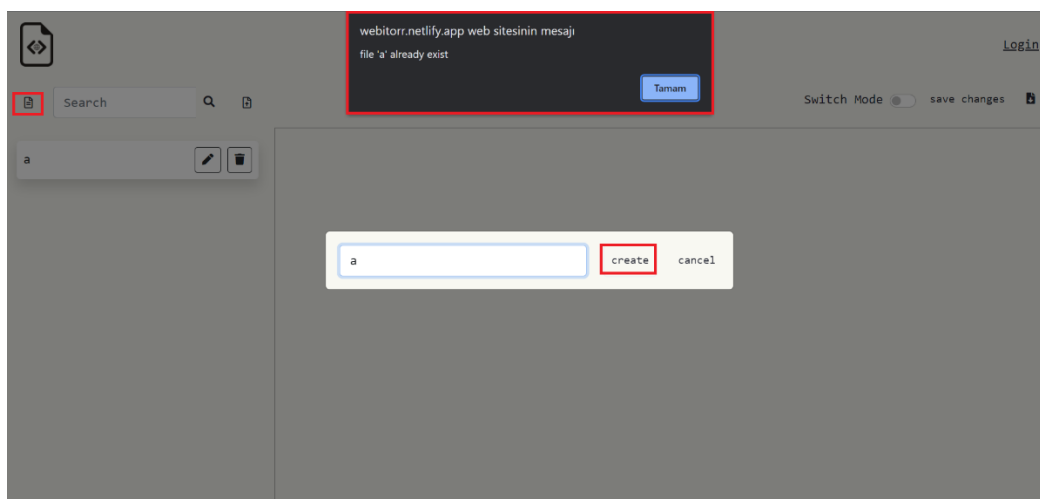

## 4-Consistency And Standarts

- Fonts are consistent for every text in the page every text uses ubuntu font (internal consistency).

## 5- Error Prevention

- When user wants to download a file without creating any , website warns the user.

- Website shows up an alert when user wants to create a file with the same name website shows up an alert.

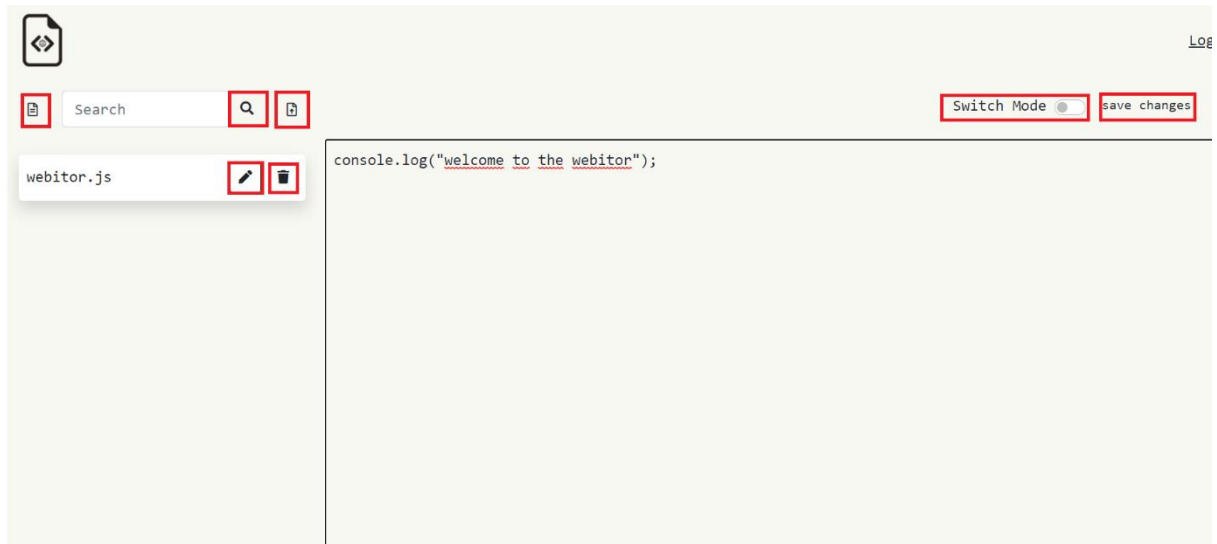

- User may close window without saving data. If user don't click to the save changes data wont be saved

- User can delete their file by mistake,there is no verification for delete operation. If user clicks to the delete button there will be no warning for the user. File is deleted instantly

## 6-Recognition Rather Than Recall

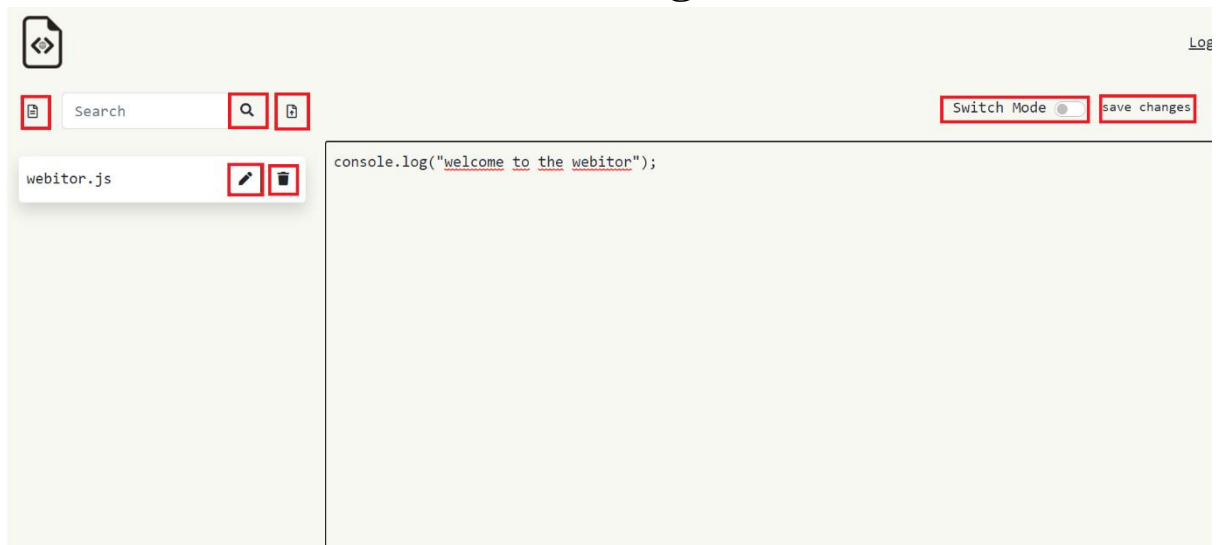

- Icons helps to the user to recognize their tasks.

## 7-Flexibility And Efficiency Of Use

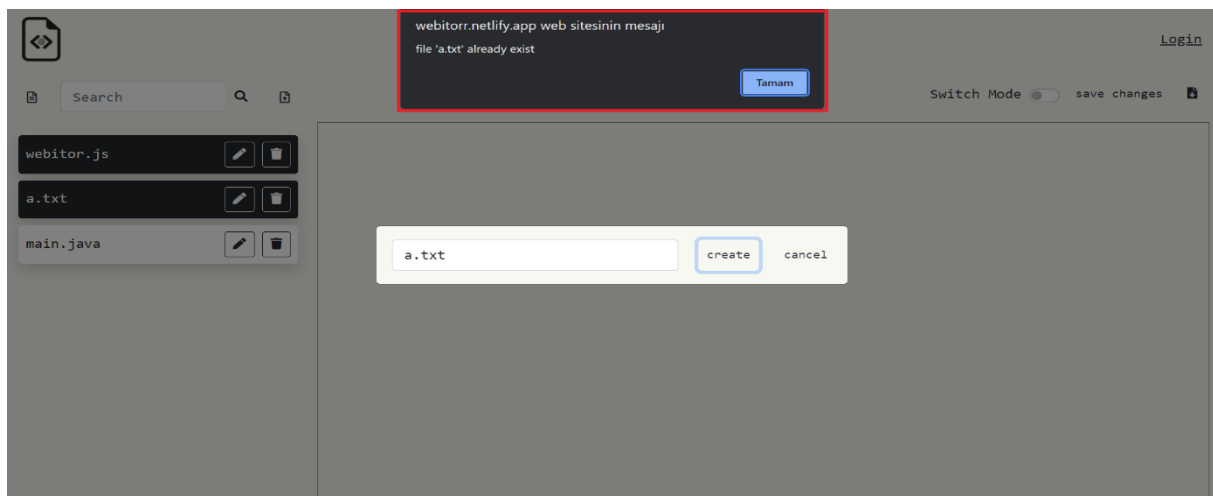

- User is free to choose their format of files while uploading or downloading (flexibility)\

## 8-Aesthetic And Minimalist Design

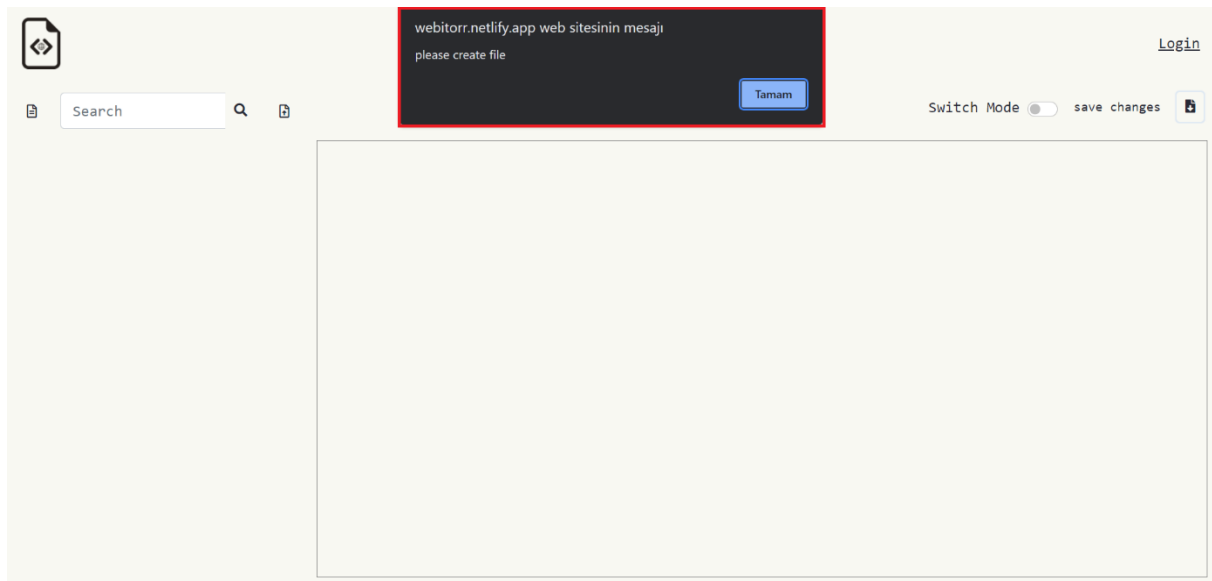

- Icons are simple, there is good contrast and few colors.

## 9-Help Users Recognize, Diagnose, And Recover From Errors

- Alert messages do not contain red text. The website tells users what went wrong in a language they will understand. It offers users a solution.

## 10- Help And Documentation

- Alerts helps user to prevent their possible mistake.
- Website does not contain documentation to explain website functionality.
